

Finances Clean Perspectives

Clean Perspectives is a non-for-profit cultural phenomenon. Institutionally, it is owned 50% by the association socio-cultural Clean Sounds (CS), registered in Spain and 50% by Cluster E.V, registered in Germany.

No private money got invested in the project during the first edition. This resulted in that none of the organisers or workshop leaders got remuneration for their work. Flights, food, accommodation and all other costs were paid out of the project budget. Budget consisted out of participants of the Cluster Residency, workshops and voluntary donations from collaborators.

For the long term sustainability of the project and potential to scale up the positive impacts we aim that for CP2017 some time invested by the organisation and workshop leaders will be paid.

Half of the benefits of Clean Perspectives will be made available to the project team. The other half will be divided over the two associations equally. Division of funds over the project team are based on registered hours worked on the project. Maximum possible hour rate is the **minimum wage in Germany**. If more funds are available these will be divided over the associations equally.

Please see below an overview of the finances of Clean Perspectives 2016.
